Education

University of Waterloo

Bachelor of Science in Software Engineering | Co-op

Sep 2026 – Apr 2031

Waterloo, ON

University of British Columbia

Access Studies in Mathematics | A+ in MATH 200

Sep 2025 – Dec 2025

Vancouver, BC

University Hill Secondary School

High School Diploma | Computer Science Advanced

Sep 2022 – Jun 2026

Vancouver, BC

Experience

vsHacks

Sept 2024 – Present

Vice Chair | Outreach, Web Development, GitHub, Event Operations

Vancouver, BC

- Co-organized vsHacks (2025&2026), a two-day online hackathon for high-schoolers, drawing 500+ participants and securing \$7K+ in in sponsorship funding
- Led sponsorship outreach, managed the DevPost registration portal, and maintained the event website
- Ran a GitHub workshop for beginner participants, developed a Discord bot to automate user-registration and tag-assignment process on Discord, and served on the judging panel
- Hosted a career advising workshop featuring a Machine Learning Engineer from Microsoft, managing event logistics and attendee engagement

University Hill Secondary School Physineering Club

Sept 2025 – June 2026

President | Physics, Engineering, Teaching, Competition Prep

Vancouver, BC

- Conducted weekly meetings and delivered lectures
- Coordinated and led teams in competitions including FYKOS, the Kwantlen Science Challenge, and UBC Physics Olympics

Learning Buddies Network

October 2025 to May 2026

Full-time Math Mentor (Volunteer) | Mathematics, Tutoring, Communication, Lesson Planning

Remote

- Taught one-on-one math lessons to an elementary student twice weekly, preparing lesson plans and joining post-lesson mentor discussions to refine my teaching
- Built strong communication skills through regular contact with students, parents, coordinators, and mentors
- Raised my student's performance in subtraction, division, and multi-step word problems, while introducing beyond-curriculum topics like decimals, area, fractions, and variables

Projects

Autonomous Line-Following Vehicle

University Hill Secondary School

Arduino · C++ · Embedded Hardware

Vancouver, BC

- Built an autonomous car that follows black-tape paths with IR sensors and avoids obstacles using an ultrasonic sensor
- Programmed the control logic on Arduino and drove the wheels' speed and direction through a motor driver
- Designed and soldered the circuit, gaining hands-on hardware experience

Skills

Languages: Java, C++, Python, JavaScript, HTML/CSS, Bash, SQL

Frameworks & Libraries: Tailwind CSS, React, NodeJS, Express

Tools & Platforms: Git, GitHub, DevPost, VS Code

Technical Strengths: Data Structures, Algorithms, Competitive Programming, Mathematics, Problem Solving

Awards & Competitions

Programming: USACO Silver Division; Canadian Computing Competition — Junior Honor Roll (full marks, 2023), Senior Top 25% (2024)

Mathematics: Euclid Contest Top 25% (2024, 2025); AIME participant; CSMC Honor Roll (2023, 2025); Cayley Contest Honor Roll (2023); Fermat Contest Honor Roll (2024); Stanford Math Tournament — team Top 40%

Physics: UBC Physics Olympics — 2nd place, Quizzics (2024, 2025)
