Minglang Chen

+1(778)-889-2665 minglang.chen@uwaterloo.ca linkedin.com/in/minglang-chen minglanging.com

Skills

Languages: Java, C/C++, Python, JavaScript, TypeScript, HTML/CSS, Bash, SQL
Frameworks & Libraries: React, React Native, Expo, Tailwind CSS, Node.js, Express, NumPy, Pytest
Tools & Platforms: Terminal, Git, GitHub, GitHub Actions, Supabase, Vite, Expo, Vercel, Autodesk Fusion, Claude Code
Technical Strengths: Data Structures, Algorithms, Competitive Programming, Mathematics
Professional Skills: Adaptability, Critical Thinking, Collaboration, Proactivity, Work Ethic, Troubleshooting

Education

University of Waterloo **Sep 2026 – Present**
Bachelor of Software Engineering (Honours, Co-op) | Recipient of President's Scholarship of Distinction *Waterloo, ON*

Experience

vsHacks **Sept 2024 – Present**
Vice Chair | Outreach, Web Development, GitHub, Event Operations *Vancouver, BC*

- Co-organized vsHacks 2025 and 2026, a two-day online hackathon for high school students
- Built and maintained the organization website with HTML and CSS, adding the schedule and past results page, managed the Devpost portal, and developed a Discord bot that automated sign-up verification and role assignment
- Led sponsorship outreach to companies, ran a GitHub workshop for beginners, hosted a career advising session with a Machine Learning Engineer from Microsoft, and served on the judging panel
- *Accomplishments*: Drew 500+ participants and $7K+ in funding; grew in shipping site features, event planning, and public speaking

University Hill Secondary School Physineering Club **Sept 2025 – June 2026**
President | Physics, Engineering, Teaching, Competition Prep *Vancouver, BC*

- Ran weekly meetings and delivered physics and engineering lectures
- Prepared and led teams at FYKOS, the Kwantlen Science Challenge, and UBC Physics Olympics
- *Accomplishments*: Learned to coordinate students of mixed experience levels

Learning Buddies Network **Oct 2025 – May 2026**
Math Mentor (Volunteer) | Mathematics, Tutoring, Communication, Lesson Planning *Remote*

- Taught one-on-one math lessons to an elementary student twice a week, preparing a plan for each session
- Refined my teaching through post-lesson mentor discussions and regular contact with parents and coordinators
- *Accomplishments*: Raised student's performance in elementary-level math; learned to adapt explanations to a young learner

Projects

Leavy: Calendar-Based Departure Alerts **Personal Project**
TypeScript · React Native · Expo · Supabase · Google Maps API · GitHub Actions *github.com/langchengit/leavy*

- Built a mobile app that reads your calendars, checks live travel time with Google Maps, and alerts you when to leave
- Added Google and Apple sign-in with Supabase to sync preferences, plus a guest mode that needs no keys or accounts
- Set up GitHub Actions for lint and type checks, Claude PR reviews, and automatic CLAUDE.md updates after each merge

Autonomous Line-Following Vehicle **University Hill Secondary School**
Arduino · C++ · Embedded Hardware *Vancouver, BC*

- Built an autonomous car that follows black-tape paths with IR sensors and avoids obstacles using an ultrasonic sensor
- Programmed the control logic on Arduino, drove the wheels through a motor driver, and designed and soldered the circuit

Zoetrope **University Hill Secondary School**
Arduino · C++ · Fusion 360 · 3D Printing *Vancouver, BC*

- Built a zoetrope with a team, flashing LEDs in sync with a spinning flywheel so 3D printed frames look animated
- Slowed the flywheel and raised torque with compound gears, 3D printing gears and stands to fit the supplied parts
- Modelled a hall sensor holder in Fusion 360 and used the measured flywheel RPM to set the LED flash frequency

Awards & Competitions

Programming: USACO Silver Division; Canadian Computing Competition: Junior Honor Roll (full marks, 2023), Senior Top 25% (2024)
Mathematics: Euclid Contest Top 25% (2024, 2025); AIME participant; CSMC Honor Roll (2023, 2025); Cayley Contest Honor Roll (2023); Fermat Contest Honor Roll (2024); Stanford Math Tournament (team Top 40%)
Physics: UBC Physics Olympics: 2nd place, Quizzics (2024, 2025)
